### **Dealing with the Damage**

While each property claim is different, the following guidelines can help you deal with property damage. Remember that common sense safety always applies.

- Never enter a damaged building unless police or fire officials have declared it safe to do so.

- If possible, move your property to protect it from further damage. If you are unable to move large belongings, try to protect them from the elements using a tarp or plastic.
- Separate damaged from undamaged property.
- Do not dispose of damaged property, especially items such as appliances or pipes that might be the source of a fire or leak.
- Document your damages with photos or video as well as a list. It's also a good idea to document your belongings in this manner as a precautionary measure.
